

Gulf County RESTORE Act Multiyear Implementation Plan

Comprehensive Community Needs Assessment

Preamble

Gulf County, Florida is identified in the RESTORE Act of 2012 as a disproportionately affected county and will receive funding directly through the Direct Component Trust Fund. Before receiving funds, the County must develop and submit a Multiyear Implementation Plan (MYIP) to be reviewed and approved by Treasury. The MYIP takes a holistic planning approach, cross connecting a variety of categories including economy, environment, infrastructure, and quality of life. The first step in development of an MYIP is to conduct a comprehensive community Needs Assessment. The Needs Assessment is meant to identify all of the critical issues facing Gulf County, as identified through various mechanisms that are relevant to the RESTORE Act.

The Needs Assessment matrix has been divided into four main categories: Economy, Environment, Infrastructure, and Community. Needs are placed into one of the four primary categories in the left column and additional categories the needs may represent are marked with "X"s in the right columns. For example, a need may be primarily represented as an infrastructure project, but may also have economic, environmental, and/or community benefits. Information for the Needs Assessment matrix was gathered through several public meetings and review of existing documents and information (see References).

The Community Needs Assessment will set the stage for identification of information gaps and development of selection criteria by which proposed projects will be evaluated. By taking a current inventory of critical community needs, the County can focus its RESTORE efforts where they are needed most. Submitted projects must address both a community need and be an eligible activity under the RESTORE Act.
